

Kiro Contract Hierarchy

Contract Structure

Contract Categories

Meta-System Contracts - Master workflow and artifact definitions

- workflow.ncl: Three-phase workflow type definitions
- artifact-specs.ncl: Artifact type specifications and DAG definitions

Schema Contracts - Project structure and content schemas

- scope-directory.ncl: Validates .kiro-scope/ directory structure
- assertions.ncl: TDD assertion schemas with RED-GREEN-REFACTOR phases
- scoped-tasks.ncl: Task decomposition and traceability schemas

Validation Contracts - Format and consistency validation

- assertion-ids.ncl: ID format validation (TASK-###- -A# with double-dash)
- markdown.ncl: Markdown structure and YAML frontmatter validation
- traceability.ncl: Cross-file reference validation for requirement chains
